

KeyPoint:

I'm a great believer of luck, and I find that the harder I work, the more I have it. I have learnt not to give up, on trials and setbacks, but instead I see it as opportunity to grow my learning experience. The ability to work with a team, to face and tackle bugs, in a system is my problem solving skills.

Seeking for a position of front-end developer in software/development system with a growth oriented organization in the software industry.

Profile:

Full Name: Prince Azubuike
